FUND STRATEGY

- Provide a stable income investment opportunity by acquiring a portfolio of diversified short term private Asset-Backed Securities, with supporting exposures to short term Mortgages and public High Yield and Corporate/Government securities
- Focus on short duration debt instruments to reduce interest rate sensitivity and achieve the Fund's liquidity objectives
- Execute origination strategies within robust Portfolio Management Guidelines, Investment Controls and Restrictions to provide prudent diversification while delivering superior risk-adjusted returns
- Apply stringent investment review platform employing fundamental bottom-up analysis to select only companies with lower risk of default and to maximize protection through the capital structure

EXPLANATORY INFORMATION

Performance Information

The indicated rates of return reflect changes to the net asset value of the Fund (the "Fund NAV") since inception, include the effects of distributions and are reported net of management and operations/underwriting fees. The rates of return are not intended to reflect future values or returns on investment in an investment fund. Investment funds are not guaranteed, their values change frequently and past performance may not be repeated.
